

At Fine Art Print Studio we offer two different printing options. STANDARD PRINTS and CUSTOM ORDER prints. Standard prints are all prints available on our website.

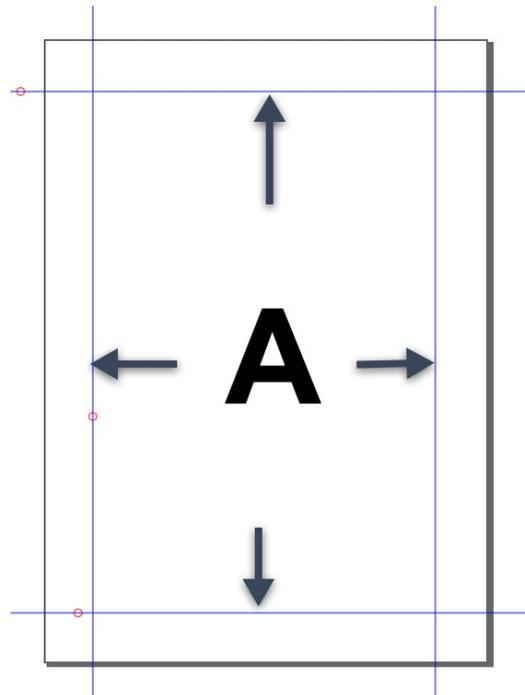

In this example we will cover our STANDARD PRINT option

Let's start with an A4 Print as an example

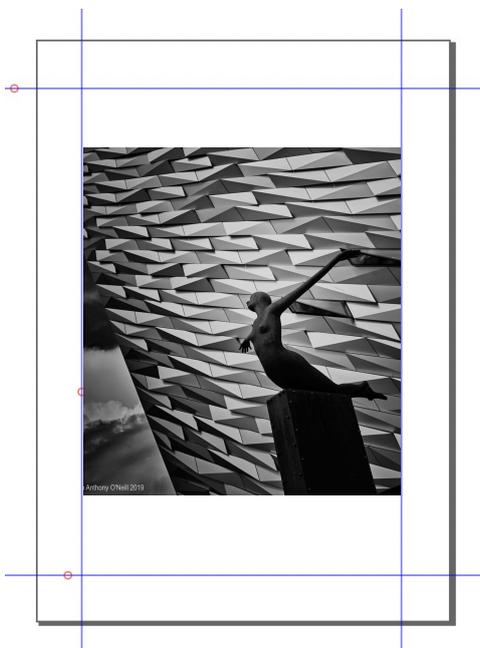

During printing we automatically add a minimum of one inch white border within your chosen paper size.

In this example, on our standard an A4 print, the area shown as "A" becomes the maximum printable area. This will always be 2 inches smaller than your chosen paper size.

Note: We will place your artwork image inside this area as large as possible without cropping your image.
